| Module title | Sustainable Natural Resource Management | | | | | | | |
|--------------------|--|--|--|--|--|--|--|--|
| Code | E3 | | | | | | | |
| Degree Programme | Master of Science in Life Sciences | | | | | | | |
| Group | Environment | | | | | | | |
| Workload | 3 ECTS (90 student working hours: 42 lessons contact = 32 h; 58 h self-study) | | | | | | | |
| Module | Name: Dr. Dominic Blaettler | | | | | | | |
| Coordinator | Phone: +41 (0)31 910 22 50 | | | | | | | |
| | Email: dominic.blaettler@bfh.ch | | | | | | | |
| | Address: Berner Fachhochschule, HAFL, Länggasse 85, 3052 Zollikofen | | | | | | | |
| Lecturers | Dr. Dominic Blaettler, BFH-HAFL | | | | | | | |
| | Sandra Wilhelm, anderskompetent.ch | | | | | | | |
| | Guest lecturers | | | | | | | |
| Entry requirements | To be able to successfully participate in this module, students should: | | | | | | | |
| | Have knowledge of the core concepts of natural resources management (NRM) | | | | | | | |
| | and sustainable development, especially in their own field of expertise or study; | | | | | | | |
| | Have a basic understanding of concepts such as human behaviour, stakeholders, | | | | | | | |
| | institutions and governance in NRM or environmental issues; | | | | | | | |
| | Take a strong interest in current issues at the human/environment interface. | | | | | | | |
| | Documents covering these aspects will be made available on Moodle, along with key | | | | | | | |
| | questions students should be able to answer (self-test). To prepare specifically for the | | | | | | | |
| | module, students will have to read up literature before the start of the module in order | | | | | | | |
| | to be well prepared for contact teaching. | | | | | | | |
| Learning outcomes | After completing the module, students will be able to: | | | | | | | |
| and competences | Work with the core principles of sustainable NRM | | | | | | | |
| | carry out a stakeholder analysis, an institutional analysis and apply techniques of behaviour change | | | | | | | |
| | Assess conflict potential over natural resources, use conflict analysis tools and devise ways of conflict mediation (link between NRM and conflict management) | | | | | | | |
| | Differentiate between approaches to NRM and relate them to policy | | | | | | | |
| | interventions/governance measures | | | | | | | |
| | Express their own opinion, debate with others, moderate discussions and produce | | | | | | | |
| | session proceedings | | | | | | | |
| Module contents | The key focus and overarching topic of the module is sustainable natural resources | | | | | | | |
| | management, understood less as a technical but rather as a complex and dynamic | | | | | | | |
| | process of human-environment interaction. Conflicts are a central issue, as natural | | | | | | | |
| | resource management is often conflict management. 'Times of Crisis, Times of Change | | | | | | | |
| | (UN, 2023) serves as a starting point for the module. Where do we stand regarding | | | | | | | |
| | natural resources and their management, what are the challenges and where do we | | | | | | | |
| | go? How are natural resources utilized, shared, by whom and how, and what norms | | | | | | | |
| | and values regulate access to natural resources, their use and distribution? | | | | | | | |

|----------------------|---|-----------------------|-----------------|-----------------|--------------|-----------------|----------|------|------------|--|
| | This paves the road for an Extended Case Study (Mongolia) where a number of the pertinent practical challenges of sustainable NRM become apparent. To go deeper | | | | | | | | | |
| | requires having a closer look at theoretical and methodological aspects of NRM which | | | | | | | | | |
| | go together with very concrete and real-life examples involving invited guest speakers | | | | | | | | | |
| | from a variety of backgrounds. Topics include: human behaviour, stakeholders, | | | | | | | | | |
| | institutions, governance, policy and conflict mediation. In addition, a series of case | | | | | | | | | |
| | studies will shed light on the diversity of approaches for the management of different | | | | | | | | | |
| | natural resources (forest, land, water). The case studies will be selected to reflect | | | | | | | | | |
| | different geographical regions, different scales of assessment, different methods of | | | | | | | | | |
| | analysis and different sources of conflict and potential solutions. Invited guest speakers | | | | | | | | | |
| | will link theory and methodology to practice by sharing professional experience from | | | | | | | | | |
| | their fields of expertise. More generally, E-3 module is also about interdisciplinary | | | | | | | | | |
| | learning and Education for Sustainable Development. | | | | | | | | | |
| Teaching / learning | Thematic/methods inputs (lectures) | | | | | | | | | |
| methods | Guest lectures | | | | | | | | | |
| | Debates, and debate moderation | | | | | | | | | |
| | Case study exercises, group work ("family tables") | | | | | | | | | |
| | Self-test | | | | | | | | | |
| Assessment of | 1. Final written exam, open book (80%) | | | | | | | | | |
| learning outcome | 2. Assessment of group moderation & discussion summary (20%) | | | | | | | | | |
